

Student Excuse Generator - AI Prompts

Main Prompt Used:

Write a beginner-friendly C++ console program called "Student Excuse Generator".

Requirements:

- Ask the user to enter a student name.
- Store at least 10 funny excuse templates in a vector.
- Use random selection so the excuse changes every time the program runs.
- Replace the placeholder {name} with the user's input.
- Display one random excuse.
- Use simple C++ concepts suitable for beginners.
- Add comments to explain the code clearly.
- Use `srand(time(0))` for randomness.
- Use string replacement logic for replacing {name}.
- Make the output creative and funny.

Bug Fixing Prompt:

My C++ excuse generator program is showing the same excuse every time I run it.

I am using:

```
int randomIndex = rand() % excuses.size();
```

How can I make the output different every time?

Please explain the fix in beginner-friendly language.
